About This Game

Adventuring Gentleman is a steampunk roguelite platform shooter where you can go on a number of adventures offered by your clubhouse members. Each adventure consists of procedurally generated floor with enemy wave sequences unique to the chosen adventure. Each adventure has three difficulty levels and lengths.

After beating each floor you are offered a choice from two powerups which will make you stronger, change playstyle and alter your dashing looks.

Depending on the length of an adventure you will face up to three boss battles with varied and very nasty adversaries with changing behaviour.

-proceeds to clean pants. 9p? Who wouldn't?. A very fun strategy game. While this game isn't too in-depth I feel this is a positive point. We focus on conquering the world and not spending an hour on every battle. It is like playing a Total War game auto-resolving every battle and not having to build anything. As for those people that say you can't do anything but one turn a year, I say move your damn armies fools. My armies move every turn four times a year. At the start of every year I am buying more armies. Once the game gets going a bit I have two or three armies going conquering the world. Navies are purchasable too and will attack with your troops in certain instances as well as fighting other navies. I usually use them for dropping off troops on other continents and when not doing that bolstering the defenses of my homeland. Recruiting is done at two provinces of your starting areas so defending these are crucial. I enjoyed this game for what it is and it is fun and not impossible to get all the achievements in a reasonable time. If you are still not sure if you will like it buy it on sale and try it out.. This game is kinda like gta\goat simulator kinda random and funny but with its own cool style making it alot of fun plus you can have a top hat on your shark so how could you not love this game :). Resynth is a great puzzler that is heaps of fun and exceptionally challenging !

You re-organise the elements of a level to restore the music.

Tonnes of levels to complete!

With a sleek aesthetic and an awesome selection of tunes.

This is a game that rewards you for being clever!. if you dont have the a2a c172 get this!. this game is sh#% i played for a few minutes and quickly realized it was worth nothing. what the heck is this, dude?. Rogue is just like black flag, but with a different story!

meh...

In my opinion the only good part about this game is the trading cards.. an overall decent game, decent story and decent combat. it does have a timer (much like Zelda Majoras mask) which was a bummer for me and some may like it. the game expects you to play through more than once as u wont get the true ending on your first playthrough but has NG+

its a little hard recomending it at its current price \$84.95 AUD but deffinity worth getting when theres a sale on (that's what i did). Simple concept however controls are difficult to get used to. Lacks polish and the game just doesn't look good. Unique gameplay, cool music, super fun!. ai just sits inthe middle of the map doing nothing and no infantry!. oregon trail mixed with dungeons and dragons. if you travel over the mountains everyone will get gangrene and die, and if your heroes don't have enough CAROUSING skill then they'll get drunk all the time. 10/10. Only been playing this for a few minutes, but its so much fun!

Great game and well worth the upgrade.. A surreal masterpiece of tense pacing with beautiful blood dripping atmosphere and gorgeous graphics alive with shocking gore mutilating the mind's innocence with experiences never to be forgotten.

Writing and story ooze with character building revelations of the unnatural bringing to mind blinding light the impossible before your shaken suddenly unbalanced sense of reality.

Music and audio kiss the soul wetly like a seductress wrapped in a veil of deceptive loneliness which without warning transforms into a disharmonious flesh cutting shower of piano keys slicing one unto tones of deafening silence.

DON'T KNOCK TWICE, if you have seen the store page it is already too late. You are already here and it is too late.. FOR YOU.. My friends and I have taken to calling this game "Tremor". Daedalus is Quake 3 Arena put through a blender and distilled to its core elements. It's great for quick bursts of action gaming, with games usually only lasting 5-10 minutes. Hence the moniker, as it's a mini-Quake.

It's a lot of fun, and has a map editor and various game modes to keep it interesting.

A recommendation for new players: The default control scheme is set to "FPS" mode, where the view rotates in the direction your character is facing. I found this control setup to be clunky and difficult to use. I recommend switching the control mode to "Classic" and checking the "Always face crosshair" option. This locks the view rotation, and the movement keys move you in an absolute direction, not a relative one. I.e., W will move towards the top of the screen, regardless of which way you're facing. It's much more intuitive for me. Always face crosshair allows you to more precisely control your character's facing, which is useful as you can fire faster, you move quickest when facing the same direction you are travelling in, and visibility is always a concern.

Another thing that's not made explicitly clear: Hit 'F' to turn on your flashlight. It's a bit of a double-edged sword, though. It'll illuminate darkened rooms and corridors, but it will also cause you to stand out to anybody else in the area. I recommend using it short bursts. Turn it on, survey the room, turn it off, and then immediately reposition.. Game is not able to be played, it gets stuck on the tutorial and cannot go any further. Others have the same issue and as yet, no response from the dev's.

It is clearly not ready for sale but they are !!
